

Greenland, cold, harsh climate...
Coming to the lighthouse is possible once a year when the Gulf Stream makes the cracks of ice masses.

Construction of the lighthouse was modeled like an inspiration with Monument of the Third International by Vladimir Tatlin. Oblique steel girders and spiral staircase around him."

«Greenland, hladna, suva klima... Do svetionika je moguće doći jednom u toku godine kada Golfika struja napravi procep ledenih masa».

Konstrukcija svetionika je radjena po uzoru na Spomenik trećoj internacionali Vladimira Tatlina. Konačnik nosač i spiralno stepenište oko njega."
