

THE PROJECT

«UAE-based Dewan Architects & Engineers has been awarded a contract to design and supervise the construction of a 150m-tall tower in Dammam, Saudi Arabia, for building material supplier Al-Abdulkarim Holding.

Ammar Al Assam, executive director, Dewan, said: "The client liked the simple volumes based on straight lines and transparency. One component is tilted, and this creates great spaces internally."

THE DETAILS

» Dewan's design features double-height glass cladding to demarcate the client's 27 office floors from the remaining lower offices which are to be leased to other firms. Completion is scheduled for 2014.

Al Assam, added, "Every office floor will have its own feel due to the tilt.

We are 90% through the design and we are due to start on site in four months."
