

# Light house//Svetionik

Light House is a project that was created by the architect team of Svetionik. The project is a modern building that is designed to be a light fixture. The building is a white, conical structure that is divided into three sections. Each section contains a light fixture. The light fixtures are designed to be modern and minimalist. The building is located in a snowy area, and the light fixtures are designed to provide a warm and inviting atmosphere. The building is a perfect example of modern architecture that is both functional and aesthetically pleasing.
