Projekat privremene montazne jedinice na plaži

Objekat se nalazi na M. jima ostrvu, udaljenom od grada, gde prevladava hladna klima. Osnovljena je kao minimalna jedinica za boravak dvoje ljudi. Projektovana je tako da zadovolji osnovne potrebe korisnika i omogućiti im obavljanje svakodnevnih stvari bez smetnji.

Kuća poseduje 40m². Zamišljena je kao produžetak plaže a kada je lepo vreme korisnici mogu iskoristiti prostoru terasu i uživati u suncu i okruženju.

The project of temporary prefabricated unit on the beach

The building is located on the M. jima island, away from the city, predominantly cold climate. It has been designed as a minimal unit stay of two people. It was designed to meet the basic needs of the users and enable them to perform everyday things without interference.

The house has 40m². It is conceived as an extension of the beach and when the weather is nice, users can take advantage of the spacious terrace and enjoy the sun and environment.
